

Dear Colleagues,

Are you interested in hosting a trainee from a different country who has received a fellowship from the International Union of Biochemistry and Molecular Biology (IUBMB)? These fellowships provide support for 4–6 months for trainees to learn new skills or develop collaborations helpful in their research. We are building a database of potential host labs that might be particularly helpful to students and postdocs from underdeveloped countries, especially ones in Africa. If you are interested in hosting an international student, please take a few minutes to fill out this [host lab form](#).

Best wishes,

Alexandra Newton

IUBMB President
